

Sr. QA Specialist for Bluebeam Software

Celebrating our 10th year, Bluebeam Software is a growing technology company made up of people who like to push the limits, be different and do great things. Our award-winning software is used by leading architecture, engineering and construction firms to implement paperless workflows and redefine the way they work, consistently resulting in faster and clearer communication, improved collaboration and reduced costs. Behind the scenes, the Bluebeam Team works collaboratively towards the common goal of helping our customers do what they do better. At Bluebeam hard work is recognized, new hires are encouraged to share their ideas and the environment is friendly, energetic and fun.

To learn more about what it is like to work at Bluebeam, watch our recruitment video:

<http://www.bluebeam.com/work-at-bluebeam>.

Our QA Tester will work closely with the other QA team members and with the development staff in a collaborative environment to extend the core functionality of our software to power new products and take existing products to the next level. Our environment is fast-paced, having product delivery cycles measured in months rather than years. You will not be given a 300 page test plan and told to, "implement this." Instead, you will be given a general task, and it is up to you to construct a path forward, coordinate your resources, and get it done.

We are a proactive, positive, tight-knit team with a great sense of humor and passion for our work. Our next team member needs to exhibit these qualities as well as meet the requirements below.

Responsibilities:

- Develop, modify, execute functional and regression tests for responsible product areas.
- Perform functionality, compatibility, integration, regression, performance, stress, security, exploratory and benchmark testing on Bluebeam's software products.
- Perform system installation and setup for test activities.
- Document all encountered bugs, subsequent fixes and verification results in our bug tracking system.
- Identify, analyze, and troubleshoot problems
- Adhere to team priorities and work well in an integrated developer/tester environment

Desired Skills & Experience

- 3-5+ years experience in Software Testing/Quality Assurance (desktop software application testing preferred)
- Degree in a technical field: Computer Science or Engineering plus.
- Solid testing skills and overall understanding of quality processes and testing methodologies.
- Very organized and strong attention to detail, with the ability to meet deadlines.
- Clear, concise, effective verbal and written communication skills.
- Solid understanding of Microsoft Windows operating systems (Win 7, Vista, Win XP, Server 2008), especially in the areas of the installation and uninstallation of programs, registry settings, and the Windows installed programs environment.
- Proficiency with Microsoft Office (Word, Excel, PowerPoint, Outlook)
- Must have a sense of humor (examples requested).
- Test experience with Mac and iPad apps is a plus.

- Must be able to work in the U.S. without employer sponsorship.
- Experience with the following is a plus: AutoCAD, Revit, SolidWorks, Navisworks, Tekla, printing file formats, particularly Adobe PDF and Postscript.

How to Apply:

If you think you are a good match for the Bluebeam team, please send your cover letter and resume to workeng@bluebeam.com.
