

File Attachments

In AutoCAD, SolidWorks and MS Office, files can be attached to a PDF file that is created. The complete file will be included as part of the PDF with an icon displayed in the PDF document indicating that a file is embedded. Multiple files, of any file type, can be attached to the document.

To insert a file in a PDF document, click **Add** in the **File Attachments** tab.

Next, select a file by clicking **Browse**, navigating to appropriate folder and selecting the file. Alternatively, you can type the path and file name of the desired file in the text box.

Finally, choose the point for displaying the file attachment icon by typing the X and Y coordinates in the appropriate text boxes or by clicking **Get Point** button and clicking the point on the document. Repeat process to attach additional files.

To modify an attachment, i.e., change the file or placement on document, select it from the list and click **Modify**. To remove a file, select the file from the list and click **Delete**.
