

## Other Toolbars – Search, Measurements, Markup List

### Search

The Search Tool,  (shortcut **Ctrl+F**), will search for text present in the active PDF file.

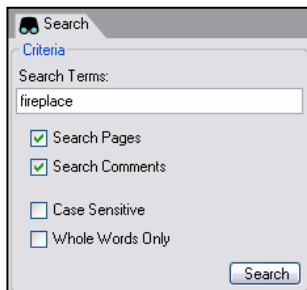

Enter the **Search Term** in the search box.

Check **Search Pages** to scan for the term in the PDF.

Check **Search Comments** to look for the search term in the annotations.

Check **Case Sensitive** to specify an exact string.

Check **Whole Words Only** to return results that have the entire search term as a separate word.

Results are displayed in the lower half of the panel in the **Results** pane.

The search term is highlighted in the phrase where the term was found. The page number where the term was found within the PDF is included at the beginning of each result. Clicking on a particular search result jumps to the location of the term in the file.
