

# Software Developer

## ASP.NET/C#, MS SQL, Web Technologies

Bluebeam Software Inc., a software company based in Pasadena, CA, has an immediate need for a software developer focused on Web technologies. We make applications that provide the best-in-class tools for working with PDF files. Our commercial software is based on Microsoft technologies, particularly C# and .NET. The applications we develop place a heavy emphasis on user interface and interactive graphical functionality built for the exacting needs of the architecture, engineering and construction fields.

We are looking for a Web Developer with solid experience developing ASP.NET/C# & SQL Server based applications.

Our environment is fast-paced, having product delivery cycles measured in months rather than years. You will not be given a 300 page specification and told to "implement this." Instead, you will be given a general task, and it is up to you to design, validate, implement and test. If something you worked on doesn't work, it's your responsibility to find a solution.

We are a proactive, positive, tight-knit team with a great sense of humor and passion for our work. Our next team member needs to exhibit these qualities as well as meet the following requirements:

### Requirements

- Bachelor's degree or higher - Computer Science or equivalent field.
- Proven Web application Development in utilizing ASP.NET, C# and MS SQL Server.
- LINQ experience a plus.
- Up to speed on general web technologies including (javascript, css, HTML5).
- Experience using OO methodologies in designing software solutions.
- Ability to work well with end users to discover requirements and implement solutions that will make getting their work done easier.
- Sharp critical thinking skills, including systems and business analysis, problem analysis and resolution, and sound judgment/decision making ability. Be prepared to give specific examples of this skill.
- Proven ability to work in a rapid release product environment.
- Know how to interact in a professional environment. Be able to contribute to technical discussions in a non-overbearing manner. Be able to see shades of grey instead of black or white when presented with an issue.

**If you think you are good match for the Bluebeam team, please send the following to [workeng@bluebeam.com](mailto:workeng@bluebeam.com):**

- Cover Letter/Email
- Resume
- A detailed description of 2 past software development projects in which you were involved. Describe your contribution to each project as well as your role.

### About Bluebeam:

Bluebeam Software develops smart, simple PDF creation, markup and editing software for paperless workflows. Our award-winning products are used by the world's top architecture, engineering and construction firms, as well as government agencies. We also have a strong following among tablet PC users, students and educators, accountants and even lawyers. Our company is an open, creative environment in which we work hard and have a great time in the process. If you have a strong work ethic and undying desire to make things your own, then Bluebeam just might be the right place for you, too. Learn more about us at [www.bluebeam.com](http://www.bluebeam.com).

### Please Note:

- Principals only. Recruiters, please don't contact this job poster.
- Please, no phone calls about this job
- Please do not contact job poster about other services, products or commercial interests.
- Pay rate: DOE
- **Position is located in Pasadena, CA.**
- **Must be able to work in the US**
- Please send resumes to: [workeng@bluebeam.com](mailto:workeng@bluebeam.com)
