

Bluebeam Q

is the ultimate workflow solution

Bluebeam Q is an enterprise, server-based solution for companies that want to centrally control and automate PDF publishing and processing. Now your customers can create high quality PDFs in a centrally managed environment by automating the production of PDFs from original source files. Bluebeam Q is installed on a server and powers PDF processing and publishing through 4 different options: Network PDF Printer, Watched Folders, Script Engine and API.

Who to Target

Companies with a large volume of end users and documents to convert to PDF

What to Ask

Ask your customers about their workflows and pain points. When you hear these answers, you will know that the solution is Bluebeam Q:

Architecture

We need to convert hundreds of thousands of drawings to PDF

Engineering & Construction

We need to submit bids and RFIs electronically

Government

We need to take the permitting process paperless

Legal

We need to have automated Bates stamping

All

We need to integrate PDF conversion with our document management system

Immediate Results

Increased productivity
Cost savings on printing, shipping and storage
Faster communication
Easy archiving

We're in Q. Are you?
