

# Custom Tool Sets

Save custom annotations in the Tool Chest™ for easy reuse across sessions.

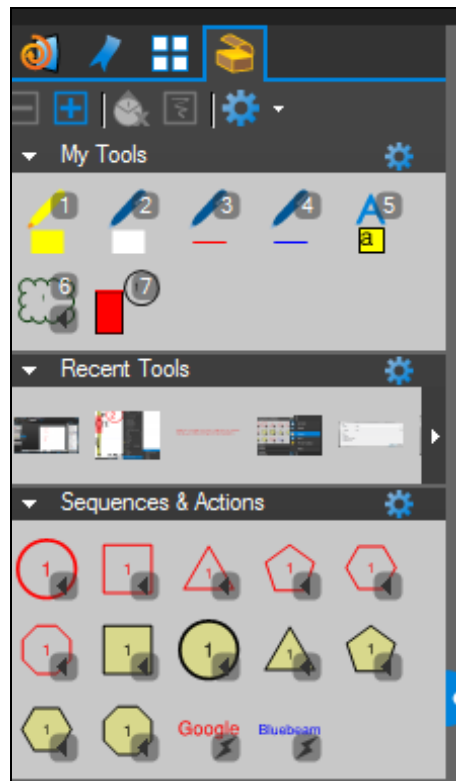

## Save Annotations

Simply right-click any annotation that has been added to your P&ID, hover over **Add to Tool Chest** and select the desired tool set.

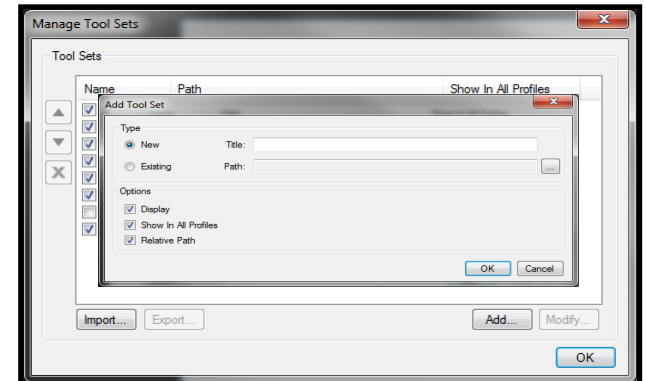

## Organize by Tool Sets

The Tool Chest is divided into tool sets to help further organize your most important annotations.

To create a custom tool set, click on the **Manage Tool Sets** icon in the Tool Chest and select **Add** from the menu. Name the tool set, and then click **OK**. Simply drag and drop annotations into the new tool set.

Tool sets can be exported and shared with other team members. Click on the **Preferences** icon next to the tool set you want to share and select **Export**.
