

A **powerful PDF solution** that digitizes project communication and delivers **real results**.

Get inspired by these success stories.

McCarthy Manages Project Documents Digitally from Start to Finish

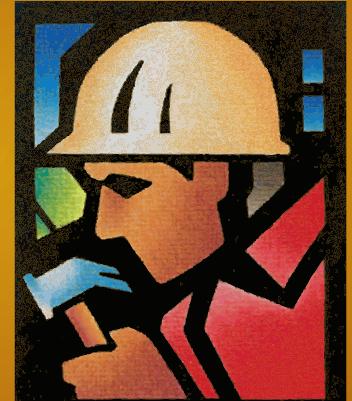

McCarthy Building Companies has pioneered innovative ways to take their projects digital, resulting in clearer, more efficient communication that reduces delays and minimizes errors. McCarthy uses Revu through the life of their projects to digitally manage workflows starting with requests for proposals and concluding with O&M manuals.

How McCarthy Uses Bluebeam:

Creates smart project PDFs by hyperlinking drawings to specifications, RFIs and more.

Digitally redlines design issues using industry-standard markup tools, and tracks each issue status using Bluebeam's built-in Markups list.

Revises PDFs using the Replace Content Feature – a helpful tool that allows users to replace pages without deleting previously created hyperlinks and annotations.

Berry, a division of Suffolk Construction, and Perkins+Will Go Paperless

Construction management firm Berry, a division of Suffolk, used Bluebeam to achieve impressive results in its quest for a paperless project. On the Overlook Center project, Berry, project architect Perkins+Will and all sub-contractors electronically redlined over 42,000 pages of construction documents in PDF – making the project almost completely paperless.

How Berry uses Bluebeam:

Distributes documents electronically in PDF, eliminating 3,042 shipments on the Overlook project alone.

Trains all project partners on Bluebeam PDF Revu and best practices for electronic markup.

Uses Bluebeam's custom markups to digitally comment on PDF drawings and project documents.

A **PDF** creation, markup and editing **solution** proven to **save time, money** and **paper**.

Bluebeam Helps **Turner Construction Company** Reduce Project Paper Costs by **63%**

A Turner Construction Company project team used Bluebeam PDF Revu to significantly reduce paper related costs on the 230,000 square foot Cobb County Superior Courthouse project in Marietta, GA. Halfway through the project's completion, Turner had already saved the Owner 65% of reprographic fees and 50% of courier fees for an overall paper cost savings of 63%.

How Turner Uses Bluebeam:

Verifies material pricing using Revu's Measurement tools to calculate length, area, perimeter, angle or diameter and count from PDFs.

Adds text stamps to batches of PDF drawings and documents to eliminate redundancy.

Assembles project PDFs by adding, deleting, inserting and rotating pages.

A **Balfour Beatty Construction** Project Team Replaces Paper Submittals with PDF

Balfour Beatty Construction used Bluebeam to eliminate nearly all costs associated with printing and shipping submittals on an \$80 million project in north Texas. The results? Sustainable project communication that has achieved tremendous time and cost savings.

How Balfour Beatty Construction Uses Bluebeam:

Composes a standard PDF submittal coversheet using Revu's template feature, complete with text boxes for easily typing comments and fields for digital signatures and stamps.

Creates and saves a custom submittal stamp with fields for inputting the submittal number and date.

Uses Bluebeam's PDF markup tools including change clouds, text and highlights to add design changes and clarifications directly onto PDF drawings.
