

**THE
BLUEBEAM
ADVANTAGE**

Bluebeam was created for those who do. Experts and professionals who seek to push their limits, to take it to the edge, to make things happen, not just talk about it. Their goals, their objectives, their work is what drives us to set a new standard, to reach a new level, to innovate where others are complacent with status quo. It is for them that we have created **Bluebeam® PDF Revu®**, a software application that is to be experienced - it takes what once was impossible and makes it possible.

Bluebeam PDF Revu 9

Revu is the perfect balance of art and science where technology has been unleashed against design. Over the last decade of innovation, we have produced break-through technologies such as Tool Chest™, Studio™, Compare Documents, MultiView™, File Access™, Sync, Dynamic Default™, and most recently, VisualSearch™. It is the passion of our people, their creativity, and their view of the world that has made this fully-loaded version of Revu a reality. The three unique editions pack more power, more performance and more flexibility than ever before. Simply stated, anything is possible.

Why Bluebeam?

One-button PDF creation

Bluebeam includes direct plug-ins for AutoCAD®, Revit®, SolidWorks®, and Microsoft Office®, for one-button PDF creation, and a PDF printer to create files from any Windows application.

No hunting for markup tools

Bluebeam's exclusive Tool Chest allows you to create and store custom tools such as stamps, signatures, and text so you can reapply markups across sessions with just one click.

Process multiple files in one batch

Convert an unlimited number of files to PDF, or any other supported file format, with Bluebeam Batch. You can even add security, stamps, headers and footers, flatten markups, and automatically compare drawing revisions.

Connect, create and collaborate

Bluebeam Studio allows you to connect, create and collaborate with anyone, anywhere, at any time. Simply upload your PDFs to Studio and invite attendees from across the globe to view and comment on your PDFs.

Totally integrated. Better file access

Bluebeam integrates into ProjectWise® and SharePoint® document management systems so you can seamlessly retrieve and check-in documents directly from Revu. Use the File Access tab to pin, organize, preview and reopen PDF files with a mouse click.

No more number crunching

Take length, area, perimeter, diameter, volume, and radius measurements, count from PDFs and perform area cutouts electronically. Bluebeam does the hard work for you. View measurements in a list, add custom formulas to calculate costs or materials, or summarize and export to Excel®.

Compare and view, then view some more

Compare drawing revisions and automatically highlight the differences or use Overlay Pages to visually compare two revisions of a drawing. Even better, split your screen up to sixteen times with MultiView and sync screens to pan and zoom in unison.

Search with more than your eyes

Bluebeam's exclusive VisualSearch allows you to select any symbol or element on a PDF and search for all instances that it occurs in the current PDF or entire folder of PDFs.

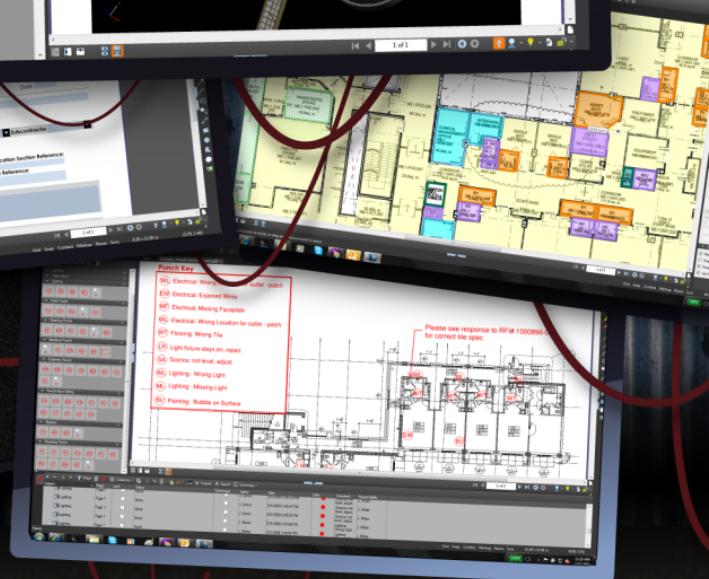

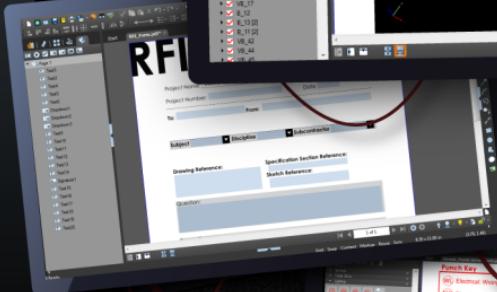

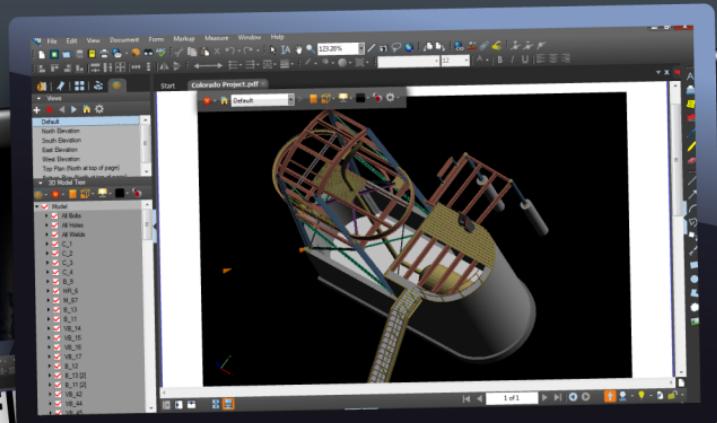

We understand there is more than one way to work

Bluebeam's custom Profiles provide an easy way to store menus, and other display settings, within Revu. Create custom toolbars, stamps, and PDF templates to fit your workflow needs. Your options are endless.

Tablet PC compatibility

View and markup PDF files with the ease of your tablet pen. Bluebeam offers tablet-specific functionality such as searchable ink, Windows Tablet PC Input Panel, pressure sensitivity, custom interface and pen-controlled zooming.

What can Revu do for you?

Architects & Engineers

Take project workflows digital from design to closeout. Convert AutoCAD and Revit files to PDF with the click of a button or effortlessly batch convert files for paperless design reviews. Redline 2D PDFs of shop drawings, field reports, RFIs, ECOs and more with industry standard markups, and save custom annotations in the exclusive Tool Chest for easy reuse.

Automatically track all comments in the Markups list which can be summarized in a PDF report, or exported to Excel. Collaborate in real time or at any time with project teams using Studio. Provide precise specifications by hyperlinking to online catalogs or attaching product sheets to PDFs. Go mobile on a tablet PC to create and track punchlists for a more complete back check and paperless closeout.

Construction

Go digital with Bluebeam to improve communication, tracking, and speed. Increase productivity by adding comments directly to project PDFs with Revu's industry standard markups. Built-in measurement tools make takeoffs easier than ever. Count quantities and calculate length, area, perimeter, diameter, volume, radius and area cutouts. For faster and more accurate bids and estimates, export measurements to Excel, or add formulas to Custom Columns to calculate costs in Revu. Create digital submittals and RFIs with Revu's complete set of PDF editing tools and stamps. Take punch lists mobile with Revu on a tablet PC and deliver as-built drawings and O&M manuals digitally to save time and money.

Mobile Professionals

Create, markup and edit PDFs on the go. Revu's tablet PC compatibility maximizes productivity and allows users to stay digital by accessing PDF files directly from the field. Ink PDFs with your tablet pen, capture signatures, insert images, monitor progress, and simplify tracking and reporting.

Government

Implement electronic plan reviews and permitting with easy-to-use PDF creation, markup and editing tools. Scan paper documents to searchable PDFs with OCR technology. Save commonly used markups, such as building code violations and custom stamps, in the exclusive Tool Chest for reuse across sessions. Direct integration with SharePoint & ProjectWise makes it simple to access files in a shared library without having to leave the Revu interface.

Legal

Save valuable time and money with digital document processes. Scan documents into searchable PDFs with OCR technology, search and redact confidential data from a batch of PDF documents and add Bates numbers. Add comments, and bookmarks, or flag changes and signature lines for better organization and clear communication.

Accounting & Finance

Create, share, and assemble PDFs for strategic, efficient communication. Convert Word or Excel files to PDF with the push of a button, or save PDFs back to their native applications for easy editing. Highlight text, add headers and footers, insert bookmarks and flags, apply custom stamps and signatures, and redact confidential data from PDFs. Scan documents into searchable PDFs with OCR technology, and create PDF forms with ease.
