Internal Tools Software Developer
ASP.NET/C#, MS SQL, Web Technologies

Celebrating our 10th year, Bluebeam Software is a growing technology company made up of people who like to push the limits, be different and do great things. Our award-winning software is used by leading architecture, engineering and construction firms to implement paperless workflows and redefine the way they work, consistently resulting in faster and clearer communication, improved collaboration and reduced costs. Behind the scenes, the Bluebeam Team works collaboratively towards the common goal of helping our customers do what they do better. At Bluebeam hard work is recognized, new hires are encouraged to share their ideas and the environment is friendly, energetic and fun.

To learn more about what it is like to work at Bluebeam, watch our recruitment video: http://www.bluebeam.com/work-at-bluebeam.

Our commercial software is based on Microsoft technologies, particularly C# and .NET. The applications we develop place a heavy emphasis on user interface and interactive graphical functionality built for the exacting needs of the architecture, engineering and construction fields.

Our environment is fast-paced, having product delivery cycles measured in months rather than years. You will not be given a 300 page specification and told to "implement this." Instead, you will be given a general task, and it is up to you to design, validate, implement and test. If something you worked on doesn't work, it's your responsibility to find a solution.

We have an immediate need for a software developer focused on Web technologies. We are looking for a Web Developer with solid experience developing ASP.NET/C# & SQL Server based applications.

We are a proactive, positive, tight-knit team with a great sense of humor and passion for our work. Our next team member needs to exhibit these qualities as well as meet the following requirements:

- Bachelor's degree or higher - Computer Science or equivalent field.
- Proven Web application Development in utilizing ASP.NET, C# and MS SQL Server.
- LINQ experience a plus.
- Up to speed on general web technologies including (javascript, css, HTML5).
- Experience using OO methodologies in designing software solutions.
- Ability to work well with end users to discover requirements and implement solutions that will make getting their work done easier.

- Sharp critical thinking skills, including systems and business analysis, problem analysis and resolution, and sound judgment/decision making ability. Be prepared to give specific examples of this skill.
- Proven ability to work in a rapid release product environment.
- Ability to work in the U.S. without sponsorship.
- Know how to interact in a professional environment. Be able to contribute to technical discussions in a non-overbearing manner. Be able to see shades of grey instead of black or white when presented with an issue.

If you think you are good match for the Bluebeam team, please send the following to workeng@bluebeam.com :

- ✓ Cover Letter/Email
- ✓ Resume

Compensation is based on experience. Bluebeam offers full-time employees excellent benefits including medical and dental insurance, 401K, paid holidays, and PTO.
