**Image Tool**

The Image Tool, (Shortcut "**I**"), places a graphic image as an annotation on the active PDF. Click the Image tool, select a file from the open dialog box, and place the image on the PDF by clicking the left mouse button.

The image can be resized by selecting the handles at the 4 corners.

Appearance Settings

The Image Properties panel displays the Appearance settings for the Image. Once the Image has been placed, use these parameters to change the image to the desired state.

Color – Sets the border color.

Fill Color - Sets the interior fill color. Opacity needs to be less than 100% to see the color effects of this setting.
